## PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Science, with hands-on experience building full-stack and AI-powered applications using Python, FastAPI, and React. Experienced in developing REST APIs, integrating machine learning and computer vision, and designing scalable backend systems. Focused on backend development, financial technology, and data-driven applications.

## EDUCATION

**Mar Athanasius College of Engineering, Kothamangalam** — Expected 2027

*Bachelor of Technology, Computer Science & Engineering (Data Science) | CGPA: 7.8*

EMEA Higher Secondary School, Kondotty — Class XII, 98.8%

VHM Higher Secondary School, Morayur — Class X, 98%

## TECHNICAL SKILLS

**Programming Languages:** Python, C++, Java (Basic)

**Web Technologies:** HTML

**Databases:** MySQL, MongoDB, Firebase

**Frameworks & APIs:** FastAPI, REST APIs, Google Maps API

**Developer Tools:** Git, GitHub, VS Code, Figma

**Core CS:** Data Structures, DBMS, Object-Oriented Programming, Problem Solving

**AI/ML:** Artificial Intelligence, Generative AI, Computer Vision (OpenCV, MediaPipe)

## PROJECTS

**Global Money Flow Intelligence Platform** | Python, FastAPI, React, TypeScript, REST APIs, PostgreSQL/MySQL | Ongoing

- Architected backend REST APIs with Python and FastAPI to process and analyze global financial and market trend data.
- Built a React and TypeScript frontend with interactive dashboards for visualizing money flow and market insights.
- Integrated secure authentication and designed a scalable PostgreSQL/MySQL data layer to support real-time analytics.

**AI-Based Driver Drowsiness Detection System** | Python, FastAPI, React, OpenCV, MediaPipe, Firebase

- Built a real-time computer vision system with OpenCV and MediaPipe to detect driver fatigue via facial landmark and eye-blink analysis.
- Implemented yawn detection and alertness monitoring logic to trigger real-time driver alerts.
- Developed a FastAPI backend and React dashboard integrated with Firebase to display live monitoring data.

**Criminal Case Management System (CRIMEX)** | React, FastAPI, MySQL

- Developed a full-stack application for managing criminal records and investigation workflows using React and FastAPI.
- Designed a MySQL relational database schema and REST APIs to support structured record management.
- Implemented authentication and role-based access control to secure sensitive investigation data.

**AI Traffic Light Control System** | Python, OpenCV

- Designed an AI-based traffic management workflow using OpenCV for real-time vehicle detection and density estimation.
- Implemented dynamic signal timing logic as part of an adaptive traffic signal control pipeline.

## LEADERSHIP & POSITIONS OF RESPONSIBILITY

**Media Head, TELEI**

- Led media campaigns and planned branding strategies for technical events, increasing event visibility through digital outreach.

**Sponsorship Team Head, ENCIDE**

- Coordinated sponsorship activities and communicated with industry partners to support technical event execution.

**Media Team Member, Google Developers Group on Campus (GDG), MACE**

- Designed promotional content and supported event branding and community engagement initiatives.

## CERTIFICATIONS

- Generative AI — International Centre for Free and Open Source Solutions (ICFOSS)
- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy
- GenAI Powered Data Analytics Job Simulation — Tata Group
- Cybersecurity Workshop — TECHMAGHI, IIT Delhi

## HACKATHONS

- NASA International Space Apps Challenge 2023 — Participant
- Technoverse Hackathon 2026 (Cognizant) — Participant
